## Aims and Scope

Vitalstoffe is the first German-language journal that aims at providing comprehensive information about the raw materials and active ingredients in food supplements as well as considering their forms of dosage and application. The focus is on the production and mixing of raw materials and their effect on human health. In addition, the subject of healthy nutrition and disease prevention is becoming increasingly important.

Scientifically sound information and studies offer the possibility of clarification, also taking into account the regulatory requirements by German and European authorities.

Readers are suppliers of dietary supplements, marketers, contract manufacturers and raw material producers up to the point of sales as well as doctors, nutrition specialists and pharmacists. The magazine is published four times a year by BK nutri network, Nuremberg.
